

Sajjad Seifi

Frontend Software Engineer

Iran , Mazandaran

+98 933 449 7255

sajjadseifilor@gmail.com

Mid-level Software Engineer with a strong specialization in frontend architecture and a solid understanding of backend integration. Experienced in managing the end-to-end development lifecycle, from building responsive UIs to deploying scalable web applications. A proactive problem-solver dedicated to bridging the gap between complex backend logic and seamless, user-centric frontend experiences.

EXPERIENCE

Military Training Base | Mazandaran

Jan 2025 – Present

• Software Engineer

FULL-Time

Developed and maintained large-scale organizational web applications using Django and Django Templates, focusing on complex data structures and real-time reporting. Implemented responsive interfaces with Tailwind CSS and jQuery to manage large-scale datasets, including hierarchical document management and automated soldier tracking systems for long-term service lifecycles

ADA Software Company | Tehran

Jan 2024 – Oct 2024

• Front-End Developer

FULL-Time

Developed responsive and user-friendly web applications, including Soul a restaurant management system and Maysa an office automation platform, by building interactive UI components with React.js and Bootstrap, while ensuring seamless API integration for real-time data handling.

Quera Company | Tehran

Mar 2024 – Aug 2024

• Bootcamp Support Mentor

PART-Time

Provided technical assistance and answered programming-related questions for students participating in software development bootcamps on the Quera platform.

Sepehr Academy | Sari

Oct 2021 – Sep 2022

• React Bootcamp Mentor

PART-Time

Guided student groups during React.js bootcamp sessions, reviewed frontend implementations, helped solve technical challenges, and provided mentorship on modern frontend development practices.

SKILLS

- HTML5
- CSS3
- Bootstrap
- Tailwind
- JavaScript
- JQuery
- TypeScript
- React JS
- Git
- Django
- DRF
- Postgres SQL
- Deploy
- IIS

EDUCATION

B.SC. IN
COMPUTER
ENGINEER, BABOL
NOSHIRVANI
2019-2024

PROJECTS

• TECOFF DIGITAL | tecoff.digital

Tech : Django, DRF, Django Templates, PostgreSQL, Tailwind CSS, IIS

Digital Menu & Catalog Platform Developed a scalable online menu system for local businesses, streamlining order management and customer interaction.

• Personal Portfolio | sajjadseifi.ir

Tech : Django, Dnago Templates, PostgreSQL, Tailwind CSS

A custom-built showcase of professional achievements and technical skills, serving as a live demonstration of full-stack capabilities.

• TesLang Compiler | Language Engineering ([source](#))

Tech : Typescript

Designed and implemented a custom programming language compiler and interpreter, demonstrating strong fundamentals in system architecture and low-level logic.

• Forumor | Interactive Programming Community

Tech : Django, Reactjs, Tailwind Css

Built a full-stack collaborative platform for community discussions, utilizing modern frontend-backend integration.

A collection of software solutions bridging robust backend architecture with intuitive frontend design. These projects emphasize code maintainability, system scalability, and a commitment to delivering high-performance, user-centric experiences.
